

Agile Services

As organizations launch their journey, they typically begin in software development by learning agile methods, transforming and developing an “Agile” mindset geared toward delivering customer value in small increments.

Agile Transformation

We help companies transform to Agile from initial launch to growing the practice to automation all the way to scaling. We assist clients by expanding Agile throughout the development organization to creating sustainable Agile practices and execution through the entire enterprise.

AGILE CONSULTING

Our Agile Consulting involves transforming organizations to gain an edge by mastering: Rapid iterations accelerate innovation. Continuous customer feedback, which maximizes delight. Constant measurement ensures teams are on the right track.

Types of Projects:

- Agile Readiness Assessment / Roadmap
- Pilot Project Selection

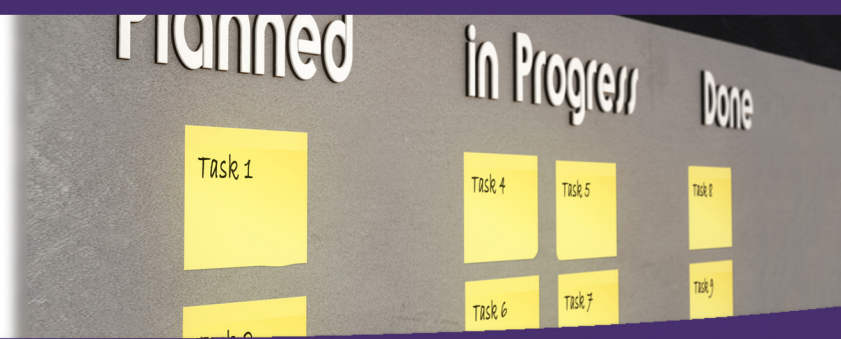

AGILE TRAINING

Our Agile Training improves project performance by teaching the basic concepts of Agile to an organization/team and how to implement it. Training helps expose the underlying Agile concepts and clarify the differences between the various implementation methods.

Types of Projects:

- Sr. Leadership Workshop
- Agile Boot Camp
- Role based workshops for the Scrum Master & Product Owner
- Technical skill training in XP, TDD

Agile Services

AGILE COACHING

Our coaches are responsible for creating and improving your Agile processes in a team/company. We spread Agile best practices between different teams; integrate Agile teams within non-Agile processes; and measure Agile transition results.

Types of Projects:

- Team Coaching
- Extension of Launch Coach to new teams (additional coaches)
- Sr Level Program Level Coach

AGILE PROFESSIONAL SERVICES

Our team is well versed in the critical nature of finding Agilists that excel in their craft. We thoroughly vet all candidates for their depth of knowledge and experience using Agile as well as associated tools.

Typical Positions Include:

- Agile Coaches
- Scrum Masters
- Product Owners
- Business Analysts
- Developers (with Agile backgrounds)
- Agile Testers
- DevOps & IT Operations

Recent Performance

Agile scrum master, coaching, and transformation services provided in support of a federal agency's systems modernization program, through an Agile Center of Excellence whose mission is to be a trusted advisor while leading the effort to enhance organizational agility. Authored or co-authored and facilitated numerous trainings including Agile Product Owner, Agile Team, Reflective Listening, Agile Facilitation 101. Work with team members individually and collectively to coach the finer points of organizational agility transformation, such as mindset, self-management, proactive task management. We bring elements of servant leadership, mentorship, coaching, teaching and facilitating to bear each day to help federal agency employees build trust, manage conflict constructively, be heard, make commitments, be accountable, and focus on bringing value. As a result, team members learn to adapt to the change, trust each other, proactively remove their own impediments, track progress and celebrate successes.

Agile coaches and scrum masters foster a collaborative environment providing recommendations, continuous improvements, and transformation guidance to a suite of Agile training curriculums including Agile Awareness seminars, Agile and Scrum Master Communities of Practice seminar series, Agile introductory seminars (Agile Awareness, Agile for Project Managers, Agile Mindset for Managers, Lunch and Learn), multi day agile training courses (for Product Owners, Scrum Masters, Agile Teams), soft skills workshops (Reflective Listening, backlog prioritization, Facilitation 101, Feature Decomposition)
